**Success in San Antonio –  
Cambridge Architectural a Hit at AIA Expo 2007**

**CAMBRIDGE, MD...** Cambridge Architectural, North America's leading manufacturer of total solution architectural mesh systems, revealed its dramatic new product line exhibit to great accolades at AIA Expo 2007 in San Antonio, TX, May 3-5.

The display's woven metal fabric panels were aglow with Integrated LED and Integrated Lighting, the latest offerings in a unique series of effects dubbed "Mesh/FX," now available on Cambridge Architectural's seven metal fabric systems.

The vivid display was impossible to miss, and Expo attendees rushed to the exhibit to learn more about the limitless functional and aesthetic applications that architectural mesh offers. Attendees were also educated on the exciting new ways to dramatically differentiate a structure by incorporating Integrated LED and reflective lighting with metal fabric.

Cambridge's HDTV giveaway was a huge draw, attracting attendees and exhibitors alike who were anxious to go home a winner. The lucky winner, Mark R. French, Senior Principal of Bay Architects, Houston, TX, was announced immediately following the Expo.

Cambridge thanks those who made AIA Expo 2007 such a success, including Ambiances Lighting and other partners who contributed to the booth design. Visit Cambridge Architectural at AIA Expo 2008 in Boston, MA, May 15-17, 2008.

Cambridge Architectural is the leading North American manufacturer of architectural mesh systems and is an applications-based and customer focused manufacturer that offers full engineering assistance throughout the design-build process. Systems applications include Facade, Space Sculpting, Corporate Branding, Security & Safety, Solar, Ventilation and Landscape Interiors.
